

Effective IT solutions for business

**PRAS is based
in Warsaw
and has been helping
businesses develop
through IT technologies
since 2011**

Main areas of our activity

Development of complex web-applications

Help to manage different user needs and provide high functionality of web-applications

Business analysis and MVP development

Determine business requirements of a minimum viable product for rapid implementation and market demand estimation

Design user-friendly interfaces

Optimise user interaction with the system for maximum comfort and efficiency

Programming of non-template solutions

Develop unique software solutions adapted to specific requirements and usage scenarios

Creating architecture, code optimisation

Develop sustainable, scalable systems with improved performance and efficiency of software code

The image shows a tablet in the foreground displaying a mobile application interface. The app has a vibrant orange and yellow background with several floating cards. The cards include a clock, a calendar, a list of items, and a document. In the background, a laptop screen displays a website with a dark theme. The website features the text "NEWS HISTORY CHARACTERS GAME MODE" in large white letters. Below this, there is a section titled "GET THE LATEST NEWS" with a search input field and a red "SEARCH" button. The browser's address bar shows a URL starting with "www.figma.com".

The challenges of your business may be unique, but if these situations are familiar to you, then we already know a way out

You have a business idea, but you don't know the best way to implement it

It's hard to find anything in your directory or registry because it's slow

Your web portal has low user engagement and depth of views

Users visit the site but don't buy anything

You'd like to automate, simplify a routine or structure your business' outputs, but you don't know how to do it

We use well-established methodologies to customise our approach to each of our projects.

This allows us to achieve high quality results and full transparency for our clients.

- 1** Analysing your business or idea **BUSINESS ANALYSIS**
- 2** Identify the strengths of the business and formulate a strategy
- 3** Propose a product that, with the new strategy, will help you achieve brilliant results
- 4** Create a user-friendly interface that is clear for the target audience and pleasant to use **UX-RESEARCH / UI-DESIGNING**
- 5** Custom development in programming makes your products and applications fast **PROGRAMMING**
- 6** Make necessary changes easily **TECHNICAL SUPPORT**

REAL CASE

Online designer furniture builder

The Geometree Variation project was conceived by the authors as a furniture constructor using parts from professional designers. PRAS company has developed a web-platform that helps to understand the essence of the project and to assemble an original piece for the home online.

FEATURES:

- Furniture model building in the administrator panel.
- 3D furniture constructor.
- User localisation by IP address with automatic selection of language version and payment currency.

REAL CASE

Web-application for project management in construction and repair

jDom is a service for the digitalisation of the construction industry.

The application helps automate routine work, interact with employees, transparently and quickly procure construction materials and deliver them to sites.

FEATURES:

- Automation of reporting on the readiness of steel work.
- Storage project documents.
- Project estimation.
- Accounting of all financial operations.
- Fixing the history of project changes.

The screenshot displays the jDom web application interface. At the top, there is a green header with the jDom logo, navigation links for 'All projects' and 'Create a project', and a 'Menu' button. Below the header, the project details are shown: 'In progress' status, 'c 02.08.2021' date, and project name 'st. Pobediteley, 123-2-34'. There are also 'Edit / Delete' options. The main content area is divided into sections for 'Customer' (Dmitry) and 'Team' (4 executors), with a 'Copy access link for the customer' button. Below this, there are tabs for 'Work', 'Materials', 'Payments', and 'Documents'. The 'Work' tab is active, showing a progress bar for 'DONE' (72%) and 'PAID' (43%, 4,300 BYN / 10,000 BYN). To the right, an 'Updates' section lists recent events: 'Ceiling work' is completed, 'Plastering walls with cement mortar with installation of beacons' is completed, 'Dates were changed in "Electrics"', 'Measurements, plan before redevelopment' is started, and 'Price was changed in "Walls for painting/decorative plaster"'. Below the updates, there is a section for 'Kid's room' with a 'Ceiling work' task (29.12.2021 - 08.01.2022, 450 BYN). This task is broken down into sub-tasks: 'Ceiling work' (165 BYN), 'Measurements, plan before redevelopment' (165 BYN), 'Installation of partitions from HA in 1 layer' (124 200 c. m / 40 BYN), 'Laying insulation' (124 200 c. m / 105 BYN), and 'Slope primer' (124 200 m. b. / 97 BYN). Each sub-task has a 'Start work' button and a progress indicator. At the bottom, there are several small images showing construction work in progress.

We pay special attention to technology and usability as well as aesthetics.

That's why all our projects are actually programmed, not just set up on off-the-shelf control systems, as is often the case with other companies.

The right software product architecture ensures consistently good results in the future.

BACKEND	C#, ASP.NET MVC, ASP.NET Core, Java, Spring, Elasticsearch, Kafka
FRONTEND	React, Angular, JavaScript, Typescript, NextJS, Sass, HTML5, CSS3, Webpack, Vite, SignalR
DEVOPS	Git, Docker, Kubernetes, Swagger, CI/CD, AWS, Azure
DATEBASE	MSSQL, MongoDB, MySQL, PostgreSQL

PRAS has a reputation as a reliable partner with a strong creative team.
